

PropKart

Report by Jay Soni

Role: Implementing and updating features

Goal: Making advancements and making propkart standalone in the market

Phase	Focus
Phase 1	Existing Module Enhancement & UX Improvements
Phase 2	Advanced CRM, Lead & Requirement Management
Phase 3	Communication, Automation & AI
Phase 4	Financial, Transaction & Operational Modules
Phase 5	Multi-Tenant SaaS, Individual, Freelancer & Agency Expansion
Phase 6	PropKart Network, Marketplace & Advanced Ecosystem

Phase 1 — Existing Module Enhancement & UX Improvements

Module	Currently Have	Update / Improve	Add
1. Dashboard & BI	Rental/Re-Sale mode, KPI cards, charts, follow-up queue, site visits, activity feed	Improve KPI accuracy, filtering, date-range controls, drill-down navigation, dashboard performance	Customizable KPI widgets, advanced operational metrics, conversion funnel, inventory aging metrics
2. Property & Inventory	Residential, Commercial, Industrial, Land/Plot, detailed property fields, media, geolocation, verification, recycle bin	Improve form structure, validation, duplicate handling, search/filtering, status lifecycle, data consistency	Property completeness score, freshness score, duplicate detection, property history, bulk operations, advanced inventory filters
3. Requirement Management	Buyer requirements, multi-area, multi-configuration, budget/area criteria, preference fields	Improve requirement validation, editing workflow, status lifecycle, requirement data quality	Requirement completeness score, requirement priority, must-have vs preferred criteria, requirement history
4. Matchmaking Engine	Rule-based property-requirement matching, multi-criteria filtering, matching readiness	Improve matching accuracy, weighting, exclusion rules and ranking	Match score, match explanation, configurable matching weights, match history
5. CRM & Deal Pipeline	Kanban pipeline, table view, lead assignment, acquisition source, deal stages	Improve stage transitions, activity tracking, filtering, ownership and follow-up workflow	Lead priority, lead health score, lost-reason tracking, inactivity detection, pipeline analytics
6. Follow-up & Task Management	Follow-up queue, task checklist, scheduled activities	Improve reminders, overdue handling, recurring activities and activity history	Automated follow-up rules, escalation mechanism, next-action recommendation
7. Site Visit Management	Site-visit scheduling, pending/completed tracking	Improve scheduling, status management and client/property linkage	Site-visit outcome, feedback capture, rescheduling workflow, visit history

Module	Currently Have	Update / Improve	Add
8. Customer / Contact Management	Owner directory, builder directory, client records	Improve deduplication, contact history and relationship linking	Unified contact profile, interaction timeline, contact-property relationship mapping
9. Client Micro-Sites	Curated property collections, branded links, WhatsApp preview, engagement tracking	Improve responsive UX, loading performance, sharing experience and analytics	Shortlist/favourite, customer feedback, property comparison, visit request
10. PDF Brochure	Branded property brochures, specifications, pricing, photo galleries	Improve templates, layout consistency, generation performance	Multiple templates, agency branding, QR code, dynamic contact information
11. Document Management	Rental, Re-Sale and Service Agent document vaults	Improve categorization, metadata, access control and document lifecycle	Document expiry tracking, verification status, document versioning
12. RBAC & Administration	Super Admin, Admin, Sales/Agent, Telecaller, route protection, audit logs	Improve permission granularity and administrative controls	Permission matrix, module-level permissions, action-level permissions, configurable roles
13. Offline-First & Sync	Isar local database, SyncManager, Repository Coordinator, delta synchronization	Improve conflict handling, sync reliability, diagnostics and synchronization performance	Sync status centre, failed-sync recovery, conflict visibility, manual resync
14. Search & Filtering	Property and requirement filtering	Improve query performance and filter UX	Global search, saved filters, recent searches, advanced compound filtering
15. Media Management	Cloudinary upload, compression, thumbnails, videos	Improve upload reliability, ordering, validation and optimization	Bulk media management, cover-image selection, media metadata

Module	Currently Have	Update / Improve	Add
16. Audit & Activity	Immutable audit logs, live activity feed	Improve event categorization, filtering and traceability	Entity-level history, user activity history, change-diff view
17. Performance & Reliability	Sentry, local caching, optimized media pipeline	Profile slow queries/API calls/UI rendering and remove bottlenecks	Performance monitoring dashboard, API latency tracking, database query monitoring
18. UX/UI System	Flutter cross-platform interface, existing dashboards/forms	Standardize components, navigation, forms, empty/loading/error states	Unified design system, responsive layouts, accessibility improvements, keyboard-first desktop workflows

Phase 1 outcome

Current PropKart → Enhanced PropKart Core

Phase 2 — Advanced CRM, Lead & Requirement Management

Module	Currently Have	Update / Improve	Add
1. Lead Management	Lead creation, assignment, acquisition source, pipeline	Lead lifecycle, ownership, activity tracking	Lead scoring, lead prioritization, lead qualification, lead aging, duplicate lead detection
2. Customer CRM	Client/contact records, owner directory, builder directory	Unified customer profile and interaction history	Customer 360° view, relationship mapping, communication timeline, customer segmentation
3. Requirement Management	Multi-area, multi-configuration, budget, area and preference criteria	Requirement lifecycle, validation and prioritization	Requirement templates, mandatory/preferred criteria, requirement priority, requirement expiry, requirement history
4. Requirement ↔ Property Matching	Rule-based multi-criteria matchmaking	Ranking, weighting and exclusion logic	Match scoring, weighted criteria engine, match explanation, automatic re-matching
5. Lead ↔ Requirement Mapping	Requirement assignment/distribution	Improve relationship tracking	Multiple requirements per customer, lead-to-requirement mapping, requirement conversion tracking
6. Property ↔ Customer Mapping	Property sharing and matching	Improve interaction tracking	Property shortlist, viewed properties, interested/rejected properties, property recommendation history
7. Lead Pipeline	Kanban pipeline with real-estate stages	Improve stage transition and workflow controls	Custom pipelines, stage-level automation, conversion metrics, pipeline aging

Module	Currently Have	Update / Improve	Add
8. Follow-up Management	Scheduled follow-ups and follow-up queue	Improve reminders and overdue handling	Automated follow-up scheduling, recurring follow-ups, follow-up escalation, next-action tracking
9. Site Visit CRM	Site-visit scheduling and tracking	Improve visit workflow	Visit feedback, customer rating, visit outcome, property-wise visit analytics, agent-wise visit performance
10. Lead Qualification	Requirement completeness and quality tier	Improve qualification criteria	Qualification questionnaire, lead temperature, buying/renting intent, urgency classification
11. Lead Source Management	Calls, referrals, website, digital ads, WhatsApp	Improve source attribution	Campaign-level attribution, source conversion rate, ROI tracking, source performance analytics
12. Customer Segmentation	Basic customer records	—	Customer tags, budget segments, location segments, investor/end-user classification, rental/resale segmentation
13. Activity Timeline	Audit/activity records	Improve CRM-specific activity tracking	Unified customer timeline covering calls, messages, shares, visits, follow-ups, notes and status changes
14. CRM Search	Property/requirement filtering	Improve search and filtering	Global CRM search, saved searches, advanced customer/lead filters
15. CRM Analytics	Basic dashboard KPIs and pipeline metrics	Improve conversion analysis	Lead-to-deal conversion, agent conversion rate, requirement-to-property conversion, average closure time, lost-lead analysis

Module	Currently Have	Update / Improve	Add
16. Duplicate Management	Basic contact detection	Strengthen entity matching	Duplicate customer detection, duplicate property detection, merge workflow, duplicate prevention rules
17. CRM Notifications	Follow-up/task reminders	Improve event-based notifications	Lead assignment alerts, requirement-match alerts, overdue alerts, site-visit alerts, pipeline-stage notifications
18. CRM Data History	Audit logs	Improve business-level history	Customer history, requirement history, lead history, property interaction history, stage-change history

Phase 2 outcome

PropKart Core CRM → Advanced Real-Estate CRM

The main objective is to make the complete workflow measurable and connected:

**Customer → Requirement → Matching → Lead → Property
Shortlist → Follow-up → Site Visit → Negotiation → Deal**

Phase 3 — Communication, Automation & AI

Module	Currently Have	Update / Improve	Add
1. WhatsApp Integration	Manual WhatsApp links / pre-filled messages	Centralize WhatsApp communication	WhatsApp Business Cloud API, templates, automated messages, delivery/read status
2. Communication Timeline	Basic activity/audit records	Consolidate communication events	Unified WhatsApp, call, SMS, email and in-app communication timeline
3. AI Lead Qualification	Manual lead/requirement entry	Automate qualification workflow	AI-based lead qualification, budget/location extraction, intent detection, lead classification
4. AI Requirement Extraction	Structured requirement form	Reduce manual data entry	Natural-language requirement → structured requirement
5. AI Property Data Extraction	Manual property entry	Improve data-entry efficiency	AI extraction from text, documents, images and uploaded property details
6. AI Property Description	Manual property descriptions	Standardize listing content	AI-generated property descriptions, highlights and short summaries
7. Intelligent Matching	Rule-based matchmaking	Improve ranking and matching precision	AI-assisted matching, semantic matching, match explanation and recommendation ranking
8. Natural-Language Search	Structured filters	Improve search interaction	Natural-language property/requirement search
9. AI Customer Recommendations	Manual property sharing	Automate recommendations	Personalized property recommendations based on requirement and interaction history

Module	Currently Have	Update / Improve	Add
10. Automated Follow-ups	Scheduled/manual follow-ups	Reduce manual CRM operations	Rule-based follow-up automation, trigger-based reminders, automated customer messages
11. AI Follow-up Assistant	Manual follow-up handling	Improve next-action decisions	Next-best-action recommendations, follow-up timing suggestions, conversation summaries
12. Cloud Telephony / CTI	Device dialer / manual calling	Centralize calling workflow	Click-to-call, virtual numbers, automatic call logging, call duration tracking
13. Call Recording	Not integrated	—	Call recording, call timeline attachment, searchable call history
14. AI Call Analysis	No automated analysis	—	Call transcription, conversation summary, intent detection, action-item extraction
15. Site-Visit Automation	Site-visit scheduling	Improve field verification	GPS-based visit verification, automated visit reminders, visit completion workflow
16. AI Analytics	KPI and trend dashboards	Improve interpretation of business data	AI-generated performance insights, anomaly detection, conversion recommendations
17. Smart Notifications	Basic task/follow-up notifications	Centralize notification logic	Event-driven notification engine, priority notifications, intelligent notification scheduling
18. AI Assistant	No centralized AI assistant	—	PropKart AI assistant for property search, CRM queries, recommendations and operational actions

Module	Currently Have	Update / Improve	Add
19. Automation Engine	Individual module workflows	Centralize automation	Trigger → Condition → Action workflow engine
20. Communication Templates	Pre-filled/manual messages	Standardize communication	Reusable templates for leads, follow-ups, site visits, property sharing, booking and status updates

Phase 3 outcome

Advanced CRM → Intelligent & Automated Real-Estate CRM

Core workflow:

**Capture → Understand → Match → Communicate → Follow-up
→ Automate → Analyze**

Phase 4 — Financial, Transaction & Operational Management

Module	Currently Have	Update / Improve	Add
1. Deal Management	Deal pipeline through Won/Closed	Strengthen booking-to-closure workflow	Centralized transaction workspace
2. Booking Management	Booking stage in pipeline	Formalize booking workflow	Booking record, booking amount, booking date, cancellation status
3. Commission Management	No dedicated commission ledger	—	Commission calculation, agent-wise commission, brokerage splits, referral commission
4. Commission Settlement	No settlement workflow	—	Payable/paid status, settlement history, payout tracking
5. Deal Accounting	Basic property/deal data	—	Deal value, brokerage value, deductions, net receivable
6. Payment Milestones	No dedicated milestone module	—	Milestone schedules, due dates, received/pending amounts, payment status
7. Invoice Management	No dedicated invoicing module	—	GST invoice generation, brokerage invoices, invoice numbering, PDF invoices
8. Tax & Compliance	Document-based compliance	—	GST/TDS tracking, tax deductions, compliance records
9. Transaction Documents	Rental and resale document vaults	Improve document-to-deal association	Transaction-specific document checklist, verification status, expiry tracking
10. Rental Transaction Management	Rental document library and property lifecycle	Strengthen rental workflow	Tenant onboarding, owner/tenant mapping, lease lifecycle, deposit tracking, rent schedule

Module	Currently Have	Update / Improve	Add
11. Resale Transaction Management	Resale document vault and deal pipeline	Strengthen closure workflow	Buyer/seller transaction workspace, agreement status, registration tracking
12. Property Handover	Possession stage in pipeline	Formalize handover workflow	Handover checklist, possession date, inspection record, handover documents
13. Vendor / Service Management	Service-agent directory with 12 verticals	Improve vendor records and service tracking	Service requests, assignment, quotation, SLA tracking, completion status
14. Expense Management	No dedicated expense module	—	Business expenses, property expenses, deal expenses, category-wise tracking
15. Revenue Management	Dashboard KPIs	Expand financial reporting	Revenue dashboard, brokerage revenue, pending receivables, monthly revenue trends
16. Deal Profitability	Basic deal information	—	Deal-level profitability, revenue vs expense, agent contribution
17. Transaction Checklist	General task checklist	Connect tasks to transactions	Automated deal checklist based on rental/resale transaction type
18. Closure Management	Won/Closed/Lost stages	Improve closure controls	Closure reason, closure date, final transaction value, post-closure workflow
19. Financial Audit Trail	Immutable audit logs	Extend audit coverage	Financial change history, payment modifications, commission adjustments
20. Operational Reporting	KPI/trend analytics	Expand reporting depth	Agent performance, brokerage revenue, transaction volume, closure rate, outstanding payments

Phase 4 outcome

CRM → Complete Real-Estate Transaction & Operations Platform

Core workflow:

**Lead → Requirement → Match → Site Visit → Negotiation →
Booking → Documentation → Payment → Commission →
Closure → Handover**

***Phase 5 — Multi-Tenant SaaS, Individual, Freelancer & Agency
Expansion***

Module	Currently Have	Update / Improve	Add
1. Multi-Tenant Architecture	Single organization/internal deployment	Isolate organization data and access	Tenant isolation, tenant context, tenant-level configuration
2. User Registration	Admin-created staff accounts	—	Self-service registration, email/mobile verification, onboarding
3. Account Types	Super Admin, Admin, Sales, Telecaller	Extend role model	Individual, Freelancer, Agency, Organization account types
4. Organization Management	Internal organization structure	Generalize organization configuration	Organization profile, branches, departments, teams
5. Agency Workspace	Internal agency workflow	Convert into reusable workspace	Agency dashboard, agency inventory, agents, leads, requirements and deal management
6. Freelancer Workspace	Internal agent workflow	Simplify for single-user operation	Personal workspace, personal CRM, inventory, requirements, follow-ups and deals
7. Individual Workspace	Not available as standalone account	—	Personal property inventory, property requirements, saved properties and sharing
8. RBAC & Permissions	Fixed role hierarchy	Generalize permission architecture	Custom roles, module permissions, action permissions, tenant-level permissions
9. Subscription Management	No SaaS billing layer	—	Subscription plans, feature entitlements, usage limits, plan upgrades/downgrades

Module	Currently Have	Update / Improve	Add
10. Tenant Configuration	Global configuration	Make configuration tenant-specific	Business settings, pipeline configuration, property settings, notification settings
11. Branding	Existing branded PDFs/micro-sites	Generalize branding	Logo, colors, company identity, branded PDFs, branded client pages
12. Custom Domain	Fixed PropKart infrastructure	—	Agency custom domain, DNS mapping, SSL provisioning
13. Public Business Profile	Client micro-sites	Expand into permanent profiles	Freelancer profile, agent profile, agency profile, organization profile
14. Agency Team Management	Internal staff management	Generalize staff operations	Invitations, team hierarchy, agent activation/deactivation, team ownership
15. Data Isolation	Internal database access model	Strengthen tenant boundaries	Tenant-scoped queries, tenant-aware API authorization, database-level isolation
16. Onboarding	Internal application initialization	Create external-user onboarding	Account setup, profile setup, business type selection, workspace initialization
17. Tenant-Level Analytics	Internal dashboard	Separate analytics by organization	Organization, branch, team and individual performance analytics
18. API & Integration Layer	Internal Node.js REST API	Formalize external API architecture	Tenant-aware API, API keys, webhooks, integration endpoints
19. SaaS Administration	Super Admin controls	Expand platform administration	Tenant management, subscription monitoring, usage monitoring, platform-level audit logs
20. Data Import / Export	Existing database	Support external migration	CSV/Excel import, bulk property import, customer

Module	Currently Have	Update / Improve	Add
			import, requirement import, data export
21. Workspace Migration	Not available	—	Organization migration, backup/restore, controlled data export
22. Notification Preferences	Application notifications	Make tenant/user configurable	Email, WhatsApp, push and system notification preferences
23. Security & Compliance	RBAC, session expiry, audit logs	Adapt security to multi-tenancy	Tenant isolation validation, enhanced session management, login/device management
24. SaaS Support Layer	Internal administration	—	Tenant support tools, account status management, suspension/reactivation workflow

Phase 5 outcome

Internal Real-Estate ERP/CRM → Multi-Tenant PropTech SaaS

The same PropKart core becomes usable by:

Individual → Freelancer → Agency → Organization

with isolated data, configurable permissions, branding, subscriptions and independent workspaces.

Phase 6 — PropKart Network, Marketplace & Advanced Ecosystem

Module	Currently Have	Update / Improve	Add
1. PropKart Network	Internal inventory	Prepare controlled external sharing	Broker/agency partner network
2. Shared Inventory	Private agency inventory	Define sharing permissions	Cross-agency inventory sharing
3. Property Collaboration	Internal property access	Improve external collaboration	Partner-to-partner property collaboration
4. Requirement Network	Internal requirements	Extend requirement visibility	Shared requirements across verified partners
5. Commission Collaboration	Internal deal/commission workflow	Extend commission logic	Partner commission splits and referral tracking
6. Public Marketplace	Client micro-sites	Expand public discovery capability	PropKart public property marketplace
7. Property Search Engine	Internal property search	Improve indexing and ranking	Public search, location search, advanced filters
8. Map-Based Discovery	Google Places/geocoding	Improve geographic search	Radius search, polygon search, map boundaries using PostGIS
9. Portal Syndication	Manual external sharing	Centralize listing distribution	One-click publishing to 99acres, MagicBricks, Housing and other portals
10. Social Distribution	WhatsApp/PDF sharing	Automate publishing	Social-media listing distribution

Module	Currently Have	Update / Improve	Add
11. Property SEO	Dynamic OpenGraph/Schema.org previews	Expand indexing strategy	SEO landing pages, locality pages, property pages
12. Public Property Profiles	Private micro-sites	Convert into public property pages	Search-engine-indexable property profiles
13. Agency Marketplace Presence	Agency workspace	Extend public visibility	Agency storefronts and public inventory pages
14. Freelancer Marketplace Presence	Personal workspace	Extend public visibility	Freelancer profile + public inventory
15. Builder Marketplace	Builder directory	Expand builder functionality	Project pages, project inventory and unit availability
16. Builder Inventory Matrix	Basic property inventory	—	Floor/Wing/Unit stacking matrix with real-time availability
17. Property Verification Network	Internal verification status	Improve verification workflow	Verified property badges, verification history and freshness
18. Partner Discovery	No external partner discovery	—	Broker/agency/service-provider discovery
19. Service Marketplace	Service-agent directory	Expand service management	Property-related service marketplace
20. Transaction Ecosystem	Transaction workflow	Connect external participants	Buyer, seller, broker, builder and service-provider transaction workflow
21. API Ecosystem	REST API	Formalize external integrations	Public API, partner API, webhooks and developer access

Module	Currently Have	Update / Improve	Add
22. Integration Marketplace	Individual integrations	Centralize integrations	WhatsApp, telephony, portals, payments, accounting and marketing integrations
23. Data Intelligence	Internal analytics	Expand aggregated intelligence	Locality trends, price intelligence, inventory trends and demand analytics
24. AI Property Intelligence	AI functionality introduced in Phase 3	Expand AI capabilities	Market intelligence, predictive pricing, demand prediction and recommendations
25. PropKart Network Analytics	Internal analytics	—	Partner performance, network activity, referral conversion and network transaction analytics
26. Public Reviews & Reputation	No public reputation layer	—	Agent, agency and service-provider ratings/reviews
27. Marketplace Monetization	SaaS-oriented revenue	—	Featured listings, promoted properties, premium placement, lead packages
28. Network Monetization	No network monetization	—	Referral fees, partner commissions and transaction-based revenue
29. Marketplace Trust & Safety	Internal RBAC/audit	Adapt for public ecosystem	Fraud detection, duplicate listings, suspicious activity detection and partner verification
30. Global Marketplace Administration	SaaS administration	Extend platform controls	Marketplace moderation, listing approval, dispute management and network governance

Phase 6 outcome

PropKart SaaS → PropKart Real-Estate Network & Marketplace

The progression becomes:

**Individual/Agency Software → Multi-Tenant SaaS → Partner
Network → Shared Inventory → Public Marketplace →
Transaction Ecosystem**

If all **6 phases are implemented properly**, PropKart would move from an **internal property CRM/ERP** into a **full real-estate operating platform + SaaS + network + marketplace**.

Final position

Platform	Primary Strength	After Phase 6, PropKart's position
99acres	Consumer marketplace & property discovery	Comparable marketplace capability , but not necessarily same audience scale
MagicBricks	Marketplace + property discovery + research	Comparable functional breadth , but weaker initial network/audience
Housing.com	Consumer UX + marketplace + broker/developer ecosystem	Comparable product breadth , with stronger internal business-operation capabilities
NoBroker	Consumer marketplace + transaction/home services	Comparable ecosystem breadth , with stronger professional-agency operating capabilities
Real Estate CRMs	Lead, sales & agency operations	PropKart can become significantly broader by combining CRM + inventory + transactions + marketplace
PropKart — Phase 6	Real-estate operating system + SaaS + network + marketplace	Hybrid category

What PropKart becomes

Competitive position

Capability	PropKart potential
Property Inventory	9.5/10
CRM	9.5/10
Requirement Management	9.5/10
Matching	9.5/10
Workflow Automation	9/10
AI	9/10
Communication	9/10
Transaction Management	9/10
Financial/Commission Management	9/10
Agency Management	9.5/10
Offline-first	10/10
SaaS / Multi-tenancy	9/10
Public Marketplace	8.5–9/10
Network / Collaboration	9/10
Property Intelligence	9/10
